

Dr. Pastramox

INT. CLASSROOM

Dr. Pastramox, mid-60s, wearing small peering glasses (that he is usually looking over and not through), black pants with a white work shirt and a rubber duck bow tie. He is sitting at his desk in the front left corner of his classroom. His name is written in bold letters on the chalkboard, front middle. A small white shiatsu sits in his lap and he is stroking it. Students file into their seats from the door across the room from the teacher's desk.

DR. PASTRAMOX

Take out your assignments for
inspection immediately

Dr. Pastramox stands up and begins to slowly pace the classroom

The first person in a row he looks at the math homework and gives a nod

The second boy is scrambling to get out his homework. Dr. Pastramox stops in front of his desk. The boy is flipping through pages in his notebook

LARRY

Sorry. I know it's here...

DR. PASTRAMOX

You know what sorries count as Larry?
Zero

Continues to pace slowly

Stops at a girls desk

DR. PASTRAMOX

There is no name. How am I supposed to
know if this is your work?

CHANELLE

I didn't think we were passing in this assignment dr...

DR. PASTRAMOX

ZZZEERRROO

Finishes making his rounds

A kid walks into the classroom late to class. Everyone is silent. Dr. Pastramox turns and stares at the kid and breaks a smile.

DR. PASTRAMOX

Roger so glad you found your way to class.

ROGER

Sorry I'm late professor, here a note from the library. I had to stay after to finish something.

DR. PASTRAMOX

I'm happy you like staying late for your classes roger that's why I SENTENCE YOU TO DETENTION AFTER SCHOOL ON WEDNESDAY

Professor Pastramox abruptly loses interest in checking homeworks and does a quick 180 to begin strolling back to his desk

DR. PASTRAMOX

Today I will be addressing integration. Your homework last night on summations should have prepared you to adequately for the subject.

However, before we start I must address some issues with last week's quiz. Too many of you passed, which leads me to

CONT

believe that a large number of you were cheating. As you know I have my ways of weeeeeding out cheaters. I suggest that those of you who may have received an artificially high score on the test join roger in detention on Wednesday. Or else I'll...

MRS. SANTANA

Dr. Pastramox?

Dr. Pastramox pauses turns to the doorway. Mrs. Santana is standing in the doorway, early 50s, business suit, large smile, would not want to see her angry, she is holding a clipboard, you can tell she holds authority.

MRS. SANTANA

I hope I'm not interrupting anything? I just wanted to stop by for a little bit and see how your class was going.

Dr. Pastramox is startled. He quickly smiles and his voice becomes warm and friendly.

DR. PASTRAMOX

Mrs. Santana. Why of course I believe there's an open seat right behind Patrick right there on the left. Stay as long as you want. Now where was I? Integration, aw yes my favorite. Before we start did anyone have any questions on the homework?

Room is silent

DR. PASTRAMOX

Well if their are no questions lets jump into it. We saw last night that certain summations have limits. If a summation converges on a value...

A phone begins to buzz on a desktop. It's Mrs. Santana's. Dr. Pastramox stops

MRS. SANTANA

I'm sorry about that I've been waiting
for this call. I have to take it

Mrs. Santana exits room with phone. Dr. Pastramox returns to his original self, possibly angrier.

DR. PASTRAMOX

Soooo no one had any questions? You
audacious group of impudent punks. No
questions? I'm sure you'll come with
questions after completing ONE THOUSAND
INTEGRALS TONIGHT FOR HOMEWORK

Door opens back up. And Mrs. Santana returns, Dr. Pastramox returns to happy persona

DR. PASTRAMOX

If you recall, we saw last week how we
could take the derivative of an
equation. The derivative returned an
equation for the slope of the original
equation. But, what if we wanted to
take the equation for the slope of a
line and find the corresponding line,
what might that look like?

Silence

DR. PASTRAMOX

Julia, how do you think we might go
about that?

JULIA

Me?

DR. PASTRAMOX

Haha. yes, you. You are Julia aren't
you?

JULIA

I didn't think you knew my name. Well
beat I guess you might do the opposite

DR. PASTRAMOX

That's exactly right

There's a buzz of the phone again.

MRS. SANTANA

I am so sorry about this Dr. Pastramox,
I have been nothing but a distraction.

DR. PASTRAMOX

Mrs. Santana, it is no problem at all.
Take your call. We'll still be here
when you done.

MRS. SANTANA

Hello

leaves the room again. Closing door behind her

DR. PASTRAMOX

Julia that was quite the response
there. Real great stuff, yeh. Why don't
you try a bit harder to get me fired?
I'm sure we will get to be well
acquainted, say I might even learn your
name

Dr. Pastarmox takes one large quick step into a 360 spin out of
which he extends his dog as if casting a spell into Julia's
face.

DR. PASTRAMOX

IN DETENTION!!!!

The dog is right in front of Julia's face

DOG

Hisss

DR. PASTRAMOX

ALL OF YOU ARE PEASANTS TO ME YOU MUST GROVEL AT MY KNEES. NONE OF YOU POSSES NEARLY THE MATHEMATICAL POWER OF I. So I suggest, when I ask a question, all of you raise your hand. Well. let's regroup.

Back to happy persona

In order to take the integral, we see that we must establish a set of rules to take the opposite

Mrs. Santan enters.

MRS. SANTANA

Again I'm so sorry professor. Please continue

Returns to her seat

DR. PASTRAMOX

To take the opposite of the derivative. Would anyone like to remind us of the derivative's chain rule?

Noah raises his hand

DR. PASTRAMOX

Noah

NOAH

Mrs. Santana this is not how our class usually is. Dr. Pastramox is a horrible man

DR. PASTRAMOX

Noah that is quite enough. That is not
the question I asked

MRS. SANTANA

Let him continue Dr. Pastramox.

NOAH

Well... he's constantly yelling,
threatening, and setting curses on us.
He's an objectively horrible teacher
and an even worse person.

Mrs. Santana stands up

MRS. SANTANA

Noah, thank you for telling me this.
But do you really think i don't know
just how evil Dr. Pastramox is?

Starts walking towards the front of the room

MRS. SANTANA

I know exactly the evil the Dr. is
capable of. That's exactly what I find
so attractive about him.

She turns her and Dr. Pastramox begin to make out in a very evil
manner.

MRS. SANTANA

Actually Noah, on Wednesday, I'll be
joining the group of you in DETENTION

Dr. Pastramox and Mrs. Santa evil laugh
